

Prompt: Process a Chapter

Use this prompt (or a variation) each time you finish a chapter and want a summary.

Copy and paste to your agent:

```
Chapter [N]: [Chapter Title if known]

[Paste the full chapter text here]

Please produce the full chapter summary package:
- Narrative summary
- Key points
- Memorable quotes
- Connections to previous chapters
- Review questions
- Flashcards

Then update the master-summary.md with this chapter's entry.
```

If uploading a file instead of pasting:

```
Chapter [N] – see uploaded file: [filename]

Please process Chapter [N] from the uploaded [PDF/EPUB/TXT].
Give me the full summary package and update the master summary.
```

If you want to add your own reaction first:

```
Chapter [N] is done. Quick thought: [your reaction, e.g. "I found the part about X
surprising"].

Now please process Chapter [N] and give me the full summary package.
```
